## SUMMARY

A self-motivated, hardworking student in IT, I am seeking an internship position to work in the IT sector of different local or multinational software companies, in its web applications development department and grow rapidly with increasing responsibilities.

## PROJECTS

[kenakata69.com](#) – Hassle-Free Online Shopping

- Achieved a secure e-commerce platform with user verification, allowing seamless product browsing and ordering.
- Technologies such as React.js, Bootstrap, SASS, Redux, and REST APIs are used to build a dynamic, responsive interface.
- Integrated REST API to ensure smooth frontend-backend communication.

[ContactBook](#) – Efficient Staff Handling via Web Application

- Achieved a secure **Backend** where the admin can manage all the staff properly.
- Technologies such as Node.js, Express.js, MongoDB, Input-validation, Authorization & Authentication, MVC architecture.

[Customer-Support](#) – Efficient and Effective Customer Service

- Developed a customer support app that streamlines communication between businesses and customers.
- Key features include real-time chat and ticket management.
- Technologies used, React.js, Redux, Material UI, Bootstrap, SASS, REST API.

## PUBLICATIONS & OTHERS

- **N. Sarker and T. R. Toma: Usability Analysis for Mobile Financial Services** – Learning to plan paths from large-scale preference feedback.
- As a Programming content creator, I specialize in crafting engaging articles & notes that simplify complex concepts for diverse audiences. Experienced in utilizing platforms such as **GitHub** and **Medium** to effectively share knowledge and insights.
